

## Executive Summary

### Develop your leadership bench strength

- Enhanced competence to tackle contemporary issues in healthcare.
- Results-focused staff development to optimize organizational outcomes and effectiveness.
- Join a global network of alumni-leaders
- Proactive succession planning

### Your peers know the benefit of the PLA

- Growing number of Directors of Pharmacy are asking us to reserve spots for their team members.
- GPOs and the federal sector provide annual scholarships.

### Exceptional value

- 12-month, online integrated program taught by a stellar faculty.
- All resources, including ebooks and a Harvard Business Review subscription, are included in the tuition.
- Each 6-week course provides your staff ample opportunities to apply the course content to affect change immediately in your organization.

### Target audience

- Existing positional, emerging and self-identified leaders at every level of the organization in every practice setting. Past participants have included Directors and pharmacists in many different roles, including:
  - Clinicians who lead interprofessional teams
  - Staff who have new responsibilities
  - Managers who need to implement new programs
  - Residents who are leading organizational projects

## More Program Details

### Core Competencies Themes

- Leading yourself
- Leading others
- Leading in the organization-wide enterprise

### Outcomes/Enhanced Skill Capabilities

- Results-focused skill building
- Leading change and innovation
- Fostering excellence in results

### Program Structure

- A stellar faculty guides the learning experiences, as subject matter experts and with broad context and experience in a range of practice roles and organizations.
- Each course consists of 6 weekly courses in a fully asynchronous and cutting edge Learning Management System.
- Additionally, there is one optional LIVE Office Hours and other opportunities to engage with faculty.
- A structured mentoring framework is offered as a means to solidify learning within the organization and to encourage “teaching in” key concepts and strategies more widely within the organization.
- Each course incorporates a hands-on application of the learning with a focus on teaming effectively to address projects related to the topic of the course.
- Integrated case is utilized to highlight and amplify critical thinking, integration of ideas and perspectives and enhance the overall learning experience.
