Major Professional Accomplishments:

- ◆ Sustained focus of involvement and leadership in the pharmacy profession—
American pharmacy, health-system pharmacy, and pharmacy education.

- ◆ Responsible for the development of a comprehensive pharmacy service program at an academic medical center, including a nationally recognized residency program in pharmacy practice management.
- ◆ Instrumental in the development of systems and education for pharmacists to assume the responsibility for intravenous admixture compounding in our nation's hospitals.
- ◆ Career-long involvement in pharmacy education, including adoption of the doctorate degree standard for the profession and development and promotion of health-system practice and community practice residency training programs.
