

COLLABORATIVE CARE GRANTS FOR NURSES AND PHARMACISTS

PROGRAM OVERVIEW

Optimizing patient-centered, team-based care is essential to ensuring equitable, effective and efficient health care. The American Nurses Foundation and the ASHP Foundation have joined in partnership to offer a competitive grant program to support innovative projects, co-led by nursing and pharmacy, to stimulate and demonstrate the impact of team-based care that enhances the safe and effective use of medications.

The American Nurses Foundation is the philanthropic arm of the American Nurses Association. The mission of the American Nurses Foundation is to transform the nation's health through the power of nursing. The ASHP Foundation is the philanthropic arm of ASHP. The mission of the ASHP Foundation is to support ASHP by advancing the professional practice of pharmacists and the pharmacy workforce by funding research and education that improves health outcomes through optimal, safe and effective medication use.

PROGRAM DETAILS

The goal of the grant program is to stimulate patient-centered interprofessional health services research that demonstrates meaningful outcomes. The program will support diverse practice-based projects including, but not limited to, demonstration projects, systems change projects, special studies and evaluations.

Requirements and Eligibility

- Problem or opportunity in practice related to optimizing medication use and outcomes
- Nurse and pharmacist to serve as co-principal investigators
- Proposal to include: the problem in practice and aim(s), the rationale and significance, expected outcomes, methods and plan, and baseline and target measures for each outcome.

Priority Considerations

- Studies that are patient-centered, such as, decrease patient harm; increase patient involvement in care; improve care transitions; reduce hospital admissions; improve quality of life and optimize resource utilization for patients with multiple co-morbidities.
- Research that includes an aim and outcomes to support creating a more diverse, inclusive, and equitable healthcare system.
- Preference to be given to projects that include measurements of team-based care or team-functioning as well as problem-specific measures.

Grantee Responsibilities and Outcomes

- Submission of a one-page abstract summarizing the research and results,
- Development and submission of a manuscript to a peer-reviewed professional journal and
- Presentation of results at a meeting, live or virtual.
